
PROFAB Plasma Pro 3 Cutting Machine

PRODUCT DESCRIPTION

[Purchase Plasma Consumables Here](#)

Features:

- Designed for the sheet metal and HVAC duct fabricator in mind
- 3/4 inch plate capable
- Combination Plasma and Insulation cutting packages available
- 5" of clearance under gantry for thick insulation materials or dissipation of heat from plate cutting
- Precision linear guide rails on the 10ft axis, dirt immune vee rails
- Dual zone exhaust for better fume extraction
- Low maintenance stepper or high power servo drive systems available
- Standard with ball caster floating torch head, CNC software integrated Automatic Torch Height Control available
- CNC compatible with all major CAD/CAM software providers

*The entire PPI Plasma Pro and Vapo Pro family of CNC machines are designed, fabricated, and

assembled in the USA. Plasma Pro machines are offered with Hypertherm Powermax series plasma units, 45, 65, 85, 105, 125amp.
